

Aleatan Vintage X

COMPOSITION

Aqueous solution based on ellagic tannins stabilized with SO₂ (0.3% ± 0.1%).

GENERAL CHARACTERISTICS

Appearance: dense dark brown liquid.

The choice, characteristics and proportions of the tannins used in this formulation make it possible to optimize the activities of each individual tannin and achieve excellent results in fermentation. **ALEATAN VINTAGE X** prevents oxidation by inactivating oxidase enzymes, particularly laccases and tyrosinases. It controls the development of bacterial flora thus allowing a reduction in the amount of SO₂ used, it is also particularly effective in grapes affected by *Botrytis cinerea*. **ALEATAN VINTAGE X** stabilizes the oxidation-reduction potential of must and wine, protecting their color and structure, and participates in the phenolic stabilization of wine.

APPLICATIONS

Its use is recommended during the alcoholic fermentation of red wines.

RECOMMENDED DOSAGES

10 to 60 g/hl at the **beginning of alcoholic fermentation** to balance oxidation-reduction potential, protect anthocyanins and polyphenols, and inactivate oxidase enzymes.

5 to 20 g/hl during racking to protect against oxidation

MODE OF USE

Add directly into the product to be treated. It is recommended that the product be thoroughly homogenized in the mass. Do not put in contact with iron containers. Shake before use.

PACKAGES AVAILABLE

Bottle 1 kg 10 kg canister 20 kg canister

STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.

Protect from air and sunlight. In its original packaging, the product retains all its properties for 12 months.

Exclusively for oenological and professional use - Reg. (EU) 2022/68

Product obtained from raw materials in accordance with O.I.V. International Oenological Codex

Contains allergens: SO₂
