

# Aleafin EMME

## COMPOSITION

Complex yeast peel product with high mannoprotein release.

## GENERAL CHARACTERISTICS

Appearance: beige-colored powder.

**ALEAFIN EMME** is a complex aging aid in which the high presence of mannoproteins and macromolecules derived from the cytoplasmic membrane allow an increase in the complexity and structure of the wine, increasing harmony and smoothness at the taste level.

**ALEAFIN EMME** contributes to the improvement of the chemical and physical stability of wine over time. It is indicated for aging and in association with the bâtonnage technique to supplement or replace the fine fermentation lees.

## APPLICATIONS

**ALEAFIN EMME** is an aging aid indicated for applications on red and white wines where important structure, increased mouthfeel volume, flavor complexity, smoothness and roundness, and stabilization of the aromatic framework and polyphenolic equipment are sought.

**ALEAFIN EMME** contributes significantly to tartaric and protein stabilization.

It is recommended to keep **ALEAFIN EMME** in contact with the wine for medium to long periods, making periodic pumping over, in order to enhance its structuring and stabilizing actions.

## RECOMMENDED DOSAGES

5-40 g/hL, depending on the products treated and the results to be obtained.

Maximum legal dose in the EU 40 g/hL

Prior laboratory testing is advisable in order to identify the optimal dosage for the product to be treated.

## MODE OF USE

Dissolve **Aleafin EMME** directly on wine, at a ratio of 1:10, then add to the mass to be treated, taking care to homogenize thoroughly.

## PACKAGES AVAILABLE

500 g bag    10 kg box (4 x 2.5 kg)

## STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.

**Exclusively for oenological and professional use - Reg. (EU) 2022/68**

**Product obtained from raw materials in accordance with O.I.V. International Oenological Codex**
