

# Aleapower FRESH

## COMPOSITION

*Saccharomyces cerevisiae* yeast autolysate , condensed tannins and aromatically active hydrolysates, inert media (cellulose).

## GENERAL CHARACTERISTICS

**Appearance:** beige-colored powder with typical yeast/tannin odor.

**ALEAPOW FRESH** increases the aromatic potential of treated musts, particularly enhancing fresh, floral and citrus notes (grapefruit, tangerine...).

**ALEAPOW FRESH** contributes to a more regular fermentation progress and promotes the maximum aromatic expression of the selected yeast thanks to its contribution of amino acids and vitamins essential to maximize the organoleptic result.

## APPLICATIONS

The use of **ALEAPOW FRESH** is recommended to obtain alcoholic fermentations with enhancement of aromatic profiles, especially on varietal white grape musts or rosé musts in which intense floral and fruity, citrusy and fresh notes are sought.

It favors the correct aromatic expression of the selected yeast strain, avoiding reductions or other aromatic deviations resulting from stunted fermentations.

The peculiarities of **ALEAPOW FRESH** are maximized by the synergy with Aleaferm CRIO, Aleaferm GRANDAROM B, Aleavit L-MAX, Aleatan FRESH improves yeast metabolism enhancing its expressiveness.

## RECOMMENDED DOSAGES

10 to 25 mL/hl, as needed.

## MODE OF USE

Disperse **ALEAPOW FRESH** into a small amount of wort, add to the fermenting mass and homogenize.

## PACKAGES AVAILABLE

Bag 1 kg    10 kg bag

## STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.

**Exclusively for oenological and professional use - Reg. (EU) 2022/68**

**Product obtained from raw materials in accordance with O.I.V. International Oenological Codex**
