

Aleatan GOLD AG

COMPOSITION

Blend of Proanthocyanidin and Ellagic Tannins.

GENERAL CHARACTERISTICS

Appearance: light beige-colored granules

ALEATAN GOLD AG is obtained by a special extraction and drying process that prevents oxidation of the polyphenolic component and volatile substances naturally contained in the wood of origin, possesses strong antioxidant power, also contributes to olfactory cleanliness, increasing freshness by reducing the oxidized and over-matured fruit note.

APPLICATIONS

The addition of **ALEATAN GOLD AG**, in aging and pre-bottling, contributes to increasing the colloidal structure and improving the organoleptic quality of wines. **ALEATAN GOLD AG** is suitable for the treatment of wines in which fresh fruit and floral notes are to be emphasized, increasing volume and persistence on the palate, while attenuating reduced and herbaceous hints.

RECOMMENDED DOSAGES

2-10 g/hl, depending on the products treated and the results to be obtained.

Prior laboratory testing is advisable in order to identify the optimal dosage for the product to be treated.

MODE OF USE

Dissolve Aleatan GOLD AG directly into water or wine to be treated. It is recommended that the product be thoroughly homogenized in the mass. Do not put in contact with iron containers.

PACKAGES AVAILABLE

500 g bag

STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.
