

Aleazym LYSO MG

COMPOSITION

Lysozyme powder

GENERAL CHARACTERISTICS

Appearance: white granular powder with characteristic odor

ALEAZYM LYSO is an enzyme preparation based on endo-glycosidase extracted from hen's egg white, suitable for the proper microbiological management of musts and wines.

As the enzyme is a protein, it is advisable to consider any protein supply resulting from treatment for protein stability purposes.

ALEAZYM LYSO contains potentially allergenic products.

APPLICATIONS

ALEAZYM LYSO is indicated for:

- use in products in which the SO₂ content is to be reduced;
- preventing spontaneous malolactic fermentation by indigenous bacteria in the mass;
- reducing the antagonistic action of bacteria against yeasts, consequently promoting the smooth course of alcoholic fermentation.

RECOMMENDED DOSAGES

- 15-25 g/hl on musts

- 20-40 g/hl on wines

Maximum allowable dose in the EC 50 g/hl

Higher dosages are recommended in wines with high tannin content.

MODE OF USE

Dissolve in mineral water at a ratio of 1:10, then add into the mass to be treated, taking care to homogenize the product well. DO NOT use at the same time as bentonite.

PACKAGES AVAILABLE

500 g bag

STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above; consume quickly.

Exclusively for oenological and professional use - Reg. (EU) 2022/68

Complies with Reg. (EC) No. 1332/2008

Product obtained from raw materials in accordance with O.I.V. International Oenological Codex
