

# Aleadet BK-76

## COMPOSITION

Alkaline Detergent Complex powder, based on Sodium Hydroxide.

## GENERAL CHARACTERISTICS

Appearance: homogeneous, mostly white granular powder.

## APPLICATIONS

**ALEA DET BK 76** is a heavy-duty, low-foam caustic powder for heavy soiling, compatible with high hardness water, which can be used for a wide range of applications in food industries.

It can be used for a wide range of applications including CIP washing, bottle washing, keg washing, floor cleaning and cleaning-passivation of new equipment.

**ALEA DET BK 76** ensures effective removal of the most tenacious contamination with special emphasis on tartrate removal and bottle washing in the wine industry and, more generally, in beverage bottling and dairy industries.

## MODE OF USE

Do not mix **ALEA DET BK 76** with acidic products.

**ALEA DET BK 76** can be used in concentrations ranging from 1 percent to 5 percent, depending on the application and the type of dirt to be removed, at a wash temperature between 10 and 65 °C.

When applied at the recommended concentrations and temperatures it is compatible with all materials commonly used in the food industry. If there is any uncertainty, it is advisable to evaluate materials individually before each extended use.

Refer to the **SAFETY DATA SHEET** for information regarding proper handling and storage of the product.

## PACKAGES AVAILABLE

10 kg canister    20 kg canister

## STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.
