

# Aleatan CASTAGNO

## COMPOSITION

Pure, powdered ellagic tannin extracted from chestnut wood.

## GENERAL CHARACTERISTICS

Appearance: brown-colored powder.

**ALEATAN CASTAGNO** is a pure ellagic tannin, composed mainly of noble polyphenolic fractions with a sweet character. The selection of raw materials used and the particular production process give this tannin peculiar antioxidant qualities, deactivating any oxidasic enzymes present and increasing the oxidoreductive power of treated musts and/or wines.

## APPLICATIONS

**ALEATAN CAS TAGNO** is particularly suitable for the preventive treatment of oxidation in the post-fermentation stages but also during wine aging. **ALEATAN CASTAGNO** also contributes to color stabilization, acting as a complexation aid and limiting the degradation reactions of some phenolic fractions (anthocyanins in particular).

## RECOMMENDED DOSAGES

- 5 to 30 g/hl at the beginning of alcoholic fermentation to balance oxidation-reduction potential, protect anthocyanins and polyphenols.
- From 3 to 25 g/hl to increase structure and play an important antioxidant action.

## MODE OF USE

Dissolve in must or wine, at a ratio of 1:10, and add directly to the mass to be treated, taking care to homogenize thoroughly. Do not put in contact with iron vessels.

## PACKAGES AVAILABLE

1 Kg Bag    10 Kg Bag

## STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.

Protect from air and sunlight. In its original packaging, the product retains all its properties for 24 months.

**Exclusively for oenological and professional use - Reg. (EU) 2022/68**

**Product obtained from raw materials in accordance with O.I.V. International Oenological Codex**
