

Aleasol EFFERVESCENT

COMPOSITION

Potassium metabisulfite (75 percent), Potassium bicarbonate (25 percent).

GENERAL CHARACTERISTICS

Appearance: homogeneous white powder with SO₂ odor.

ALEASOL EFFERVESCENT performs antioxidant, antioxidantase and antiseptic functions toward undesirable microbiological flora. It also performs an extractive action towards the phenolic substances present in the grapes.

The presence of Potassium Bicarbonate allows a good effervescence that allows the product to stir without performing mechanical actions.

APPLICATIONS

Treatment of grapes, musts and wines to prevent oxidation and microbiological contamination in general. In case of use outside the wine industry, it is recommended to check the relevant Legislation for the area of use.

RECOMMENDED DOSAGES

12 g/hl of ALEASOL EFFERVESCENT provides about 5 mg/l of SO₂.

MODE OF USE

Dissolve directly into the must or wine to be treated, keeping it stirring.

CAUTION: Treatment releases Carbon Dioxide and may cause foaming.

PACKAGES AVAILABLE

100 g bag 250 g bag Bag 1 kg

STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.

Exclusively for oenological and professional use - Reg. (EU) 2022/68

Product obtained from raw materials in accordance with O.I.V. International Oenological Codex

Contains allergens: SO₂
