

Aleadet B-35

COMPOSITION

Liquid solution based on Hydrogen Peroxide.

GENERAL CHARACTERISTICS

Appearance: clear colorless liquid.

B 35 is a hydrogen peroxide-based formulation formulated for applications in packaging processes for sterilization of polyacetal and plastic packaging materials.

APPLICATIONS

B 35 is a 35 percent solution of hydrogen peroxide enriched with stabilizers to prolong the efficacy of the active ingredient.

B 35 has a maximum residue of 150 mg/kg at 105°C.

B 35, after evaporation, leaves no residue that can affect food quality.

Designed for non-residue technology in aseptic operations, it increases machine productivity.

MODE OF USE

Place packaging materials in contact with the product as is. When used for sanitizing solutions dilute the product to varying concentrations depending on the water used and the environment of use. Compatible with Steel, Plastic Materials and Polybonded Materials. Any product residues are removed by evaporation.

Refer to the MSDS for information on handling and storage of the product.

PACKAGES AVAILABLE

10 kg canister 20 kg canister

STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above; consume quickly.
