

Aleatan GOLD CH

COMPOSITION

ALEATAN GOLD CH is a blend of Ellagic Tannins stabilized with gum arabic (Acacia Senegal) selected particularly for its structuring-softening effect.

GENERAL CHARACTERISTICS

Appearance: brown, thick and viscous liquid.

ALEATAN GOLD CH prevents oxidation of the positive volatile components of tannin, which therefore remain reactive toward the volatile compounds in wine.

Synergistic reactivity with wine odor molecules allows the appearance of more intense and persistent aromatic notes.

It contributes to the increase in volume and structure in treated products, enhancing the sensation of softness and attenuating acid and bitter sensations.

APPLICATIONS

Its use is recommended during wine maturation.

RECOMMENDED DOSAGES

2 to 10 g/hl to allow more intense and persistent aromatic notes to appear.

It contributes to the increase in volume and structure in treated products, enhancing the feeling of softness and attenuating acid and bitter sensations.

MODE OF USE

Add directly into the product to be treated. It is recommended that the product be thoroughly homogenized in the mass. Do not put in contact with iron containers. Shake before use.

PACKAGES AVAILABLE

Bottle 250 g Bottle 1 kg

STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.

Protect from air and sunlight. In its original packaging, the product retains all its properties for 12 months.

Exclusively for oenological and professional use - Reg. (EU) 2022/68

Product obtained from raw materials in accordance with O.I.V. International Oenological Codex
