

# Aleadet RINSE

## COMPOSITION

Citric acid, potassium bisulfite in aqueous solution.

## GENERAL CHARACTERISTICS

Appearance: colorless liquid.

Food washing aid with sanitizing effect.

**ALEADET RINSE** thanks to its acidity gives surfaces shine after rinsing, even in the presence of hard water. Its special formula based on organic acids and sanitizers makes it possible to keep the surfaces of oenological equipment suitable from a microbiological point of view for a longer time, thus eliminating the need for additional washing before their reuse.

**ALEADET RINSE** makes it possible to keep sanitized storage tanks that do not refill immediately after washing.

## APPLICATIONS

Its special formula, based on organic acids and sanitizers, makes it possible to keep the surfaces of oenological equipment microbiologically suitable for longer, thus eliminating the need for additional washing before reuse. In addition, **ALEADET RINSE** allows any storage tanks that do not refill immediately after washing to be kept sanitized.

## RECOMMENDED DOSAGES

Use 2 to 5%

## MODE OF USE

Disperse **Aleadet RINSE** in water or directly into the product to be treated. Homogenize thoroughly but slowly to reduce foaming.

## PACKAGES AVAILABLE

20 kg canister

## STORAGE CONDITIONS

Store in the original unopened packages or, where applicable, in special storage tanks away from extreme temperatures and other chemicals.
