

# Aleatan GOLD T3

## COMPOSITION

**ALEATAN GOLD T3** is a mixture of Ellagic Tannins and Proanthocyanidins, stabilized with gum arabic (Acacia Senegal).

## GENERAL CHARACTERISTICS

Appearance: brown, thick and viscous liquid.

**ALEATAN GOLD T3** carries out an effective preventive action toward oxidative processes of the positive volatile components of wine, contributing to their persistence and an increase in the shelf-life of treated wine. Synergistic reactivity with wine odor molecules allows the appearance of more intense and persistent aromatic notes, especially with a sweet and floral profile.

**ALEATAN GOLD T3** contributes to olfactory cleanliness, increasing freshness by reducing oxidized and over-ripened fruit notes and bringing aromatic and flavor complexity.

## APPLICATIONS

Its use is recommended during the wine maturation period.

## RECOMMENDED DOSAGES

From 2 to 10 g/hl to allow the appearance of more intense and persistent aromatic notes.

It contributes to the increase in volume and structure in treated products, enhancing the feeling of softness and attenuating acid and bitter sensations.

## MODE OF USE

**ALEATAN GOLD T3** can be dissolved directly into wine. Mix all the mass thoroughly to ensure even distribution.

Do not use iron containers.

Shake before use.

## PACKAGES AVAILABLE

## STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above; consume quickly.

Protect from air and sunlight. In its original packaging, the product retains all its properties for 12 months.

**Exclusively for oenological and professional use - Reg. (EU) 2022/68**

**Product obtained from raw materials in accordance with O.I.V. International Oenological Codex**
