

Aleatan FRESH

COMPOSITION

Liquid aging aid based on Proanthocyanidin and Ellagic tannins.

GENERAL CHARACTERISTICS

Appearance: dark brown liquid.

ALEATAN FRESH possesses strong antioxidant power, at the same time performing a preventive action against ferric casse; it also contributes to olfactory cleansing, increasing freshness and improving the structure and flavor breadth of treated wines.

APPLICATIONS

ALEATAN FRESH can be used:

- on young wine
- during maturation

Fractional additions are possible to improve the organoleptic profile of the wine.

RECOMMENDED DOSAGES

From 5 to 30 g/hl, depending on the product to be treated and the technological objective to be achieved.

It is advisable to conduct prior laboratory tests in order to identify the optimal dosage for the product to be treated.

MODE OF USE

Add directly into the product to be treated. It is recommended that the product be thoroughly homogenized in the mass. Do not put in contact with iron containers. Shake before use.

PACKAGES AVAILABLE

Bottle 250 g Bottle 1 kg Bag in Box 10 kg

STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.
