

Aleatan GOLD FR

COMPOSITION

Ellagic tannins.

GENERAL CHARACTERISTICS

Appearance: light brown granules.

ALEATAN GOLD FR a new extraction technique, avoids oxidation of the positive volatile components of tannin, which therefore remain reactive with wine volatile compounds.

Synergistic reactivity with wine odor molecules allows the appearance of more intense and persistent aromatic notes. It contributes to the increase in volume and structure in treated products, enhancing the sensation of softness and attenuating acid and bitter sensations.

APPLICATIONS

The addition of **ALEATAN GOLD FR**, both in wines and musts, contributes to the increase of colloidal structure and the improvement of the organoleptic quality of wines. **ALEATAN GOLD FR** is suitable for the treatment of wines in which the sweet and fruity notes are to be emphasized, increasing the sensations of softness and sweetness, at the same time attenuating those of astringency and bitterness.

RECOMMENDED DOSAGES

2-10 g/hl, depending on the products treated and the results to be obtained.

Prior laboratory testing is advisable in order to identify the optimal dosage for the product to be treated.

MODE OF USE

Dissolve Aleatan GOLD FR directly into water or wine to be treated. It is recommended that the product be thoroughly homogenized in the mass. Do not put in contact with iron containers.

PACKAGES AVAILABLE

500 g bag

STORAGE CONDITIONS

Unopened package: store in a cool (temperature below 25°C), dry and ventilated place.

Open package: close tightly and store as indicated above.

Protect from air and sunlight. In its original packaging, the product retains all its properties for 24 months.

Exclusively for oenological and professional use - Reg. (EU) 2022/68

Product obtained from raw materials in accordance with O.I.V. International Oenological Codex
