APPLICATIONS

Alea KRISTALL FLASH promotes the formation and growth of potassium bitartrate crystals in wines by acting as a crystallization germ.

It promotes complete and rapid cold tartaric stabilization of treated wines, especially with continuous cold stabilization equipment.

RECOMMENDED DOSAGES

From 20 to 400 g/hL, depending on the type of wine to be treated and the stabilization treatment used.

When used on continuous cold stabilization plants, use the dosages specified by the plant manufacturer.

MODE OF USE

Disperse **Alea KRISTALL FLASH** directly into the mass to be treated, homogenizing it thoroughly and keeping the solution stirring.

When using on continuous cold stabilization equipment, follow the method of use specified by the equipment manufacturer.
